DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 19, 2006 has been entered. Claims 1-6 and 14-18 are withdrawn. Claim 7 is amended. Now, Claims 7-13 and 19-28 are pending for consideration.
2. Claim rejection(s) under 35 USC 102(b) in the previous Office Action (Paper No. 101505) is/are removed.

3. The text of those sections of Title 35, U.S. code not included in this action can be found in a prior Office Action (Paper No. 101505).

Specification

4. The disclosure is objected to because of the following informalities:

As mentioned in the previous Office action (Paper No. 0405), the CHART 1 in page 18 is improper. Applicants are advised to replace it with a formal drawing with a corresponding Brief Description of Drawing.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. Claims 7-10 and 19-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Lubbers (US 5 739 245).

Lubbers discloses a polymeric composition produced through the polymerization of a mixture comprising an amino-containing hydrolyzable silane monomer. (col. 1, lines 6-61 and Examples). Hydrophobic monomers such as diisocyanates of isophorone diisocyanate, etc., diamines such as isophoronediamine, etc. or glycols such as polybutylene glycols, etc. can be used. Hydrophilic monomers such as ethylene glycol, etc. (col. 3, lines 5-43) Since Applicants do not define specifically what and how much strengthening effect of the strengthening agents, the aforementioned diisocyanate, etc. certainly can also function as strengthening agents. Note that the amino-containing hydrolyzable silane monomer can certainly function as a crosslinking agent.

Art Unit: 1712

6. Claims 11-13 and 27-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the above references teaches or fairly suggests the specific monomers set forth in the instant claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuo-Liang Peng whose telephone number is (571) 272-1091. The examiner can normally be reached on Monday-Friday from 8:30 AM to 5:00 PM.
